Circonix Technologies Announces Partnership with Propack Services, Inc.

Ringwood, New Jersey, January 2006 – Circonix Technologies LLC, a leading systems integrator in the converting, film and web conveyance industries offers a wide range of engineering and design services dedicated to enhancing and optimizing facilities operations. As part of their expansion and growth, Circonix Technologies welcomes ProPack Services, Inc. as their South East sales representative.

ProPack Services, provides solutions for manufacturers and users of flexible packaging, coated, laminated and metallized films and papers. ProPack Services, with over 20 years of experience in materials, process engineering and web manufacturing operations, including film extrusion, metallizing, coating, laminating and converting, conducts consulting projects focused on process systemization and control, process engineering and cost reduction. ProPack designs every project specifically to benefit the customer's bottom line. This focused approach accelerates the customer's ability to reach improvement objectives faster and profitability sooner.

Michael Murphy, Vice President of Sales and Marketing of Circonix Technologies, stated "We are very pleased to announce the addition of ProPack Services to our growing sales and support staff. ProPack will bring a level of expertise and engineering skill to our field representatives, joining us in our goal to provide superior service and support to our customers."
