Circonix Moves to New Corporate Headquarters in Ringwood New Jersey

Ringwood, New Jersey, October 2004 – Circonix, a leading systems integrator in the web conveyance industry, has announced their move into a new corporate headquarters, located in Ringwood, New Jersey.

This new 15,000 ft² facility provides Circonix with the increased space and expansion needed to accommodate their growing business. Andre Icsó, President of Circonix, views this next stage in our growth as a tremendous value for current and potential clients. “This new facility will allow Circonix to continue providing the highest quality of engineering services for the converting industry, as well enable us to offer new services and products over the coming months.”

The new location expands the key support hub in Circonix’s already strategically located facilities throughout the US, with a manufacturing facility in North Carolina, a sales and service office in Dayton, Ohio and an additional service office outside of St. Paul, Minnesota.

Circonix continues to commit to its mission of superior engineering, high quality systems and outstanding customer service. In order to maintain this standard of quality, Circonix will continue to grow to meet and exceed the needs of the converting and supplementary industries.

The strength of the Circonix team is built on 15 years of successful project implementation, which incorporates both electrical and mechanical expertise to retrofit and upgrade existing control systems as well as provide OEM’s with the latest controls technology for new equipment

The new contact information for Circonix is:

Circonix Technologies, LLC
29 Executive Parkway
